

When selecting "Gift" as the shipment content category, you may include only items that qualify as gifts

What is a "Gift"?

- It is a handmade item or something that belongs to you personally.
- It is not a purchased item.
- The item must not contain any commercial information — such as a logo, advertisement, or price tag.
- Its value does not exceed 100 USD.
- It is sent without any conditions — free of charge, without exchange or any other compensation.
- It can be sent only from a private individual to another private individual.
- Company shipments cannot be considered gifts, because a gift is not related to commercial activity, not even within sales promotions, loyalty programs, or presentations.

Attention!

- If the shipment contains even one item that does not meet the "Gift" category requirements, another content category must be selected — Goods, Returned Goods, Product Sample, or Other.
- If it is determined that the shipment does not meet the "Gift" requirements, customs duties will be applied, to be paid by the sender.
